Subject: Tonight's Cancellation Message- Please proof

Ramona,

Can you please distribute the following message to the user community:

The SEMS 1.7 deployment scheduled to begin tonight is cancelled. This change in deployment schedule is necessary in order to ensure access to the SEMS Production environment this weekend in support of the continued response to the Gold King Mine situation. We will work with NCC to reschedule the deployment as soon as possible. We apologize for any inconvenience, and appreciate the understanding regarding the cancellation.

Also, if possible, please update the Portal with the same message.

Thanks, Bill
